Although support for applicants' amendment claiming a single-phase membrane containing (i) a hydrophobic matrix polymer and (ii) a hydrophilic non-ionic polymer is found in paragraph 202 of US 2002/0127474 A1, support for such a single phase membrane having a *substantially non-porous structure* is not found in the specification as filed. Applicants' recitation of a homogeneous single phase structure does not require the structure to be non-porous, as a structure can be homogeneously porous.
